

Ethereum Shanghai Upgrade

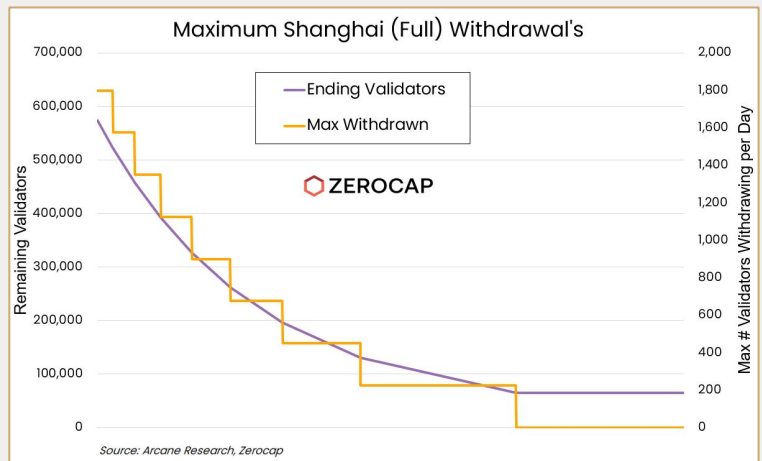

What is the Shanghai Upgrade?

The Ethereum Shanghai upgrade is a hard fork that is anticipated to go live in mid-April 2023. The upgrade includes two major upgrades: Shanghai - an execution layer upgrade, and Capella - a consensus layer upgrade. Most importantly, the fork will allow stakers and validators to withdraw their staked principal and rewards, which are currently locked on the Beacon Chain. Moreover, it will instil more confidence in sidelined investors and institutions to participate in staking Ethereum.

There are a few critical reasons why we expect this event to be a **positive** for Ethereum.

1. Less selling pressure than the market anticipates

- › The full withdrawal queuing mechanism limits the amount of validators that can exit per day
- › The expected volume from 'partial' withdrawals is a small % of daily volume and will take roughly 4 days to become fully liquid.

2. Current Stakers are 'Liquid' Stakers

- › Currently, the liquid staking segment contributes ~45% of total Ethereum that is staked.
- › With 'liquid' staking primitives growing in popularity, largely due to the 32Ξ bonding restriction, we can argue that a significant proportion of Ethereum stakers are agnostic to this upgrade.
- › Additionally, staking pools & CEXs are incentivised to keep their validators running - although this will ultimately fall down to the user preference in these pools & venues.

3. Potential for Large Supply Imbalances

- › With sidelined institutions and investors now having increased capacity to stake and withdraw their principal & rewards, we expect large supply imbalances to occur after the fork.
- › We have already seen a strong uptick in interest of **institutional staking** of Ethereum. An estimated yield of 5% is great incentive for a utility token with deflationary supply mechanics and ESG benefits (proof-of-stake model).
- › Any affect of existing stakers discontinuing their validators will likely be neutralised by **new stakers**.
- › The staking ratio of Ethereum, relative to circulating supply, is the lowest of layer-1 networks. We expect this to at least double in percent by the end of 2023.

Coin	Staking Ratio	Market Cap (bn)
	71.5%	7.92
	70.9%	11.64
	48.87%	7.25
	39.86%	10.46
	14.87%	188.97

ETH Yield Enhanced Entry Note

Product Description

An investor with a positive outlook on the Shanghai fork may be suited to the ETH Yield Entry Note.

Yield Entry Notes involve entering the market at enhanced levels while also earning yield.

Example Levels

Current ETH Market Price	\$1806
Strike Price	\$1625
Strike % below	10%
Current Yield %	6.21% (24.58% p.a)

Terms

Min. Investment	\$50,000
Currency	USD
Expiry	30 June 2023
OTC Fee	1.0%

Risk Profile

1. May suit investors with a stable to moderately bullish view on ETH.
2. May not suit investors who think a major bull run in ETH is likely before expiry.
3. May not suit investors who think ETH will fall significantly before expiry.
4. Maximum loss for this product is the initial investment amount.

About Zerocap

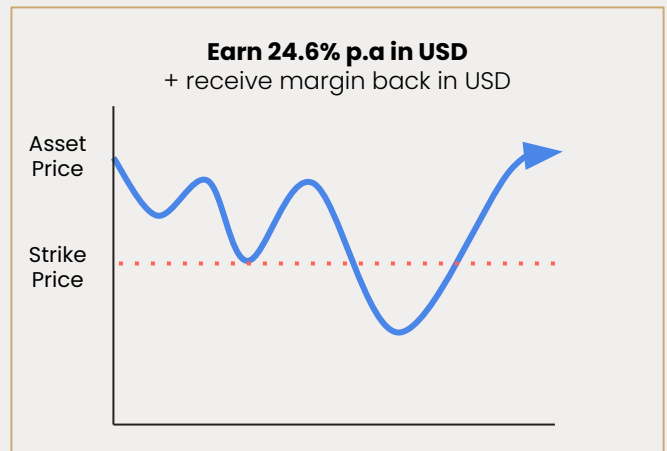

Zerocap is a market-leading investment firm for digital assets, providing unique investment products and technology to forward-thinking investors and institutions globally. To discuss how ETH and other crypto assets fit into your investment strategy, contact us at hello@zerocap.com or phone (AU): 1800 ZEROCAP (937622) | phone: +61 3 9491 8256

Only Two Outcomes
